

TCORS

Center for the
Assessment of Tobacco
Regulations
[CASToR]

Dana Rubenstein, MD, will share her [CASToR pilot project work](#), which models the impact of a nicotine reduction standard (NRS) on people with disabilities.

Specifically, she will cover:

- Model construction, including parameterization
- Simulation model results for projected smoking prevalence and public health harms from 2023-2100 in people with disabilities in under scenarios with and without an NRS.
- Potential public health benefits of an NRS for people with disabilities.

Tuesday, April 14th, 3-4pm ET
